

Public Comment for November 10, 2009 City Council, Financing Authority, Housing Authority, Redevelopment Agency Meeting

Prepared by the Office of the City Clerk- (916) 808-7200 @12:00 pm on 11-10-2009

Agenda Item	Name	District	Position	Comment
19. Estimated Time: 45 minutes Green Waste Ballot Initiative	Steve Vincent	District 4	Oppose	Please do not force bins on downtown residents. Bins do not make sense in the central city. 1) We don't have room for another large bin in our tiny driveways 2) We don't have big lawns like suburbs? so don't have much green waste except in the fall 3) When we have have green waste? it's leaves in the Fall- more than any bin can handle 4) Bins will not prevent leaves or reduce mosquitos The City has pushed bins & been negligent scooping leaves. Give us service what we're billed for or refund us
19. Estimated Time: 45 minutes Green Waste Ballot Initiative	Brandie Humphreys	District 4	Oppose	If we are forced on containers? it will make sense to cut down our tree. Leaves are the only yard waste we have. We want to keep the claw in downtown.
19. Estimated Time: 45 minutes Green Waste Ballot Initiative	Joshua Lurie-terrell	District 3	Oppose	I don't want a bin. I don't see the piles of (usually dry) leaves as an eyesore or a breeding-ground for mosquitoes. Let us keep the claw.
19. Estimated Time: 45 minutes Green Waste Ballot Initiative	Jeremy Goldberg	District 3	Oppose	We are opposed to moving from pile pick up to mandatory bins. Our neighborhood features several large trees in excess of 20 ft tall. During the Fall we will simply not have enough space in a bin to fit all of our leaves. As a result? people will either dump their excess leaves into the street anyway or not pick them up at all (since there will be no room). If the City actually picked the leaves up every week (instead of doing it sporadically)there would be no issues regarding mosquitoes.
19. Estimated Time: 45 minutes Green Waste Ballot Initiative	Joy Korstjens	District 4	Oppose	I strongly oppose Green Waste bins in the downtown area. My green waste footprint is very small? but the City tree in front of my house drowns me in leaves every fall and winter. There is no way to put that many leaves in a green waste bin? even if I had the room for another can in my tiny yard? which I don't. The fact that the two apartment buildings across the street from me? and all the State buildings in the area? don't have to have green waste bins is also a huge injustice.
21. Informational Report: Community Racial Profiling Commission Quarterly	No Name Provided	Citywide	Support	Sacramento is a pretty diversified city? so there is a need to keep in check if there is any racial profiling
