Welcome to the City of Sacramento Redistricting Application!

How to use the Redistricting Tool

Overview

The City of Sacramento is providing this web-based tool for individuals and groups to create and submit prospective redistricting plans that will be reviewed and considered by the City of Sacramento www.cityofsacramento.org/redistricting. This application provides the ability to move and reorganize census population information between the eight (8) council districts in the city. Essentially, an individual or group will make these adjustments using the web-based tools provided, review and check the district boundaries and accompanying census population information, share these plans with other, and then submit them for consideration. The outline below shows the general process to complete the redistricting submission process.

At the top of the redistricting application a set of numbered tabs are provided that indicate the specific step in the process.

Once an individual or group becomes familiar with the overall process and an overview of the application's functionality (**1 Learn**) they can begin creating the new council district boundaries (**2 Create**). Once the council districts are created,
