The landscaped area shall include a combination of trees, mounded turf and/or live ground cover and shrubs. A fully automatic irrigation system shall be provided. The landscaped area must be 25 feet clear, excluding curbs. Sidewalks are allowed in this area only when necessary for handicapped access. When vehicles overhang and no wheel

stops are provided, the landscaped area must be increased to 27 feet. A six-inch raised curb farther than 15 feet from the property line, this curb is not required. If there is less than 15 feet of turf, this requirement may be modified subject to the review and approval of the planning director.

D. Footnote 41 of Section 17.24.050 is amended as follows:

1. Subsection d. viii. of Footnote 41 is amended to read as follows:

a. In the OB, EC-30, EC-40, or EC-45, HC, SC, C-2, C-3, C-4, M-1, M-1(S), M-2 and M-2(S) zones, a drive-through services facility shall be permitted when incidental to a permitted use in the underlying zone, subject to the granting of a planning commission special permit.

b. A drive-through service facility is not permitted in the C-2 NC zone or the EC-50 zone.

c. A drive-through service facility is not permitted in the EC-65 and EC-80 zones, except that if the EC-65 or EC-80 zone is within an employment center project in the North Natomas Community Plan area which is the subject of a development agreement executed on or before July 1, 2001, then a drive-through service facility shall be permitted when incidental to a permitted use in the underlying zone, subject to the granting of a planning commission special permit..

d. Findings. A special permit shall not be granted for a drive-through service facility unless the planning commission, in addition to the findings required by Section 17.212.010 of this title, makes the following additional findings:

(i) The design and location of the facility will not contribute to increased congestion on public or private streets or alleys adjacent to the subject property.

(ii) The design and location of the facility will not impede access to or exit from the parking lot serving the business, impair normal circulation within the parking lot or impede pedestrian movement properties.

e. Development Standards. The following standards shall be used by the planning commission in analyzing the adequacy of the design of the drive-through service facility. A variance in accordance with Chapter 17.216 of this title is required to modify the following standards:

i. A minimum stacking distance of 180 feet shall be provided to each pick-up window or automated machine.

ii. A facility with a separate ordering point(s) and pick-up window(s) shall provide stacking space for at least four vehicles in advance of each ordering point and stacking space for at least four vehicles between each ordering point and pick-up window.

iii. Entrances to drive-through lanes shall be at least 25 feet from driveways entering a public or private street or alley.

iv. Drive-through service facilities shall not be considered as justification for reducing the number of required parking spaces.

v. The minimum width of each drive-through lane shall be 11 feet. The entrance to the lane and the direction of traffic flow shall be clearly designated by signs and pavement marking or raised curbs.

vi. A solid six-foot high masonry sound wall shall be constructed on the property boundary when the site is contiguous to residentially zoned or used property.

vii. Operation of the drive-through service facility shall be restricted to between the hours of seven a.m. and ten p.m. when the site is contiguous to residentially zoned or used property unless the planning commission approves different hours of operation as a condition of approval of the special permit.

f. Revocation of Special Permit. The special permit is revocable if congestion attributable to inadequate vehicle stacking space for the drive-through service facility regularly occurs on public or private streets or alleys, or the design of the facility creates a nuisance to adjacent properties and the management of the facility cannot alleviate the situation.

g. Guidelines. The following guidelines shall be used in analyzing the adequacy of the design of the facility. The planning commission may require redesign of a drive-through facility to comply with these guidelines.

i. Public address speakers, on-site lighting, and drive-through lanes shall be designed and located such that noise, exhaust fumes and stray light will not create a nuisance for adjacent properties.

ii. Placement of a canopy over the pick-up window is desirable to protect the customer from inclement weather. However, the canopy can not be used as justification to reduce the amount of required on-site shading.

iii. Interior landscaping shall be installed on the site to offset the extensive pavement area devoted to the drive-through lane(s).

F. Footnote 75 of Section 17.24.050 is amended to read as follows:

Notwithstanding Chapter 17.132, prior to the hearing before the planning commission or zoning administrator, the design of an apartment project that is subject to design review under Chapter 17.132 and is located within a design review district for which design review guidelines have been adopted shall be heard and/or reviewed in the manner provided in Chapter 17.132, but the reviewing body shall forward a recommendation to the planning commission or the zoning administrator on the project design, rather than take action as provided in Chapter 17.132.

iii. Projects Subject to Preservation Review—Recommendation on Design. Notwithstanding Chapter 17.134, prior to the hearing before the planning commission or zoning administrator, the design of an apartment project that is subject to preservation review under Chapter 17.134 shall be heard and/or reviewed in the manner provided in Chapter 17.134, but the reviewing body shall forward a recommendation to the planning commission or the zoning administrator on the project design, rather than take action as

provided in Chapter 17.134.

c. Findings. In addition to the findings required by Chapter 17.220, no apartment project shall be approved unless the zoning administrator or planning commission finds that the project is consistent with the multi-family residential design principles (Resolution No. 2000-487), as they may be amended from time to time; provided that, where the project is located within a design review district for which design guidelines have been adopted, the design guidelines shall apply, and the zoning administrator or planning commission shall not approve a project unless, in addition to the findings required by Chapter 17.220, the zoning administrator or planning commission finds that the project is consistent with the applicable design guidelines. Upon approval of a plan review of an apartment project by the zoning administrator or planning commission, no further design review shall be required.

d. Management and Maintenance Requirements.

i. General Rule. All development standards and conditions of approval of plan review or a special permit for an apartment project shall be continuously met by that project. Buildings and premises, including paint, siding, roofs, windows, fences, parking lots and landscaping shall be kept in good repair. Premises shall be kept free of junk, debris and abandoned vehicles.

ii. Conditions of Approval. The following conditions apply to apartment projects subject to plan review or a special permit, provided that the zoning administrator or planning commission has the authority to waive or modify the conditions, and provided further that nothing in this section alters, modifies or restricts the authority of the zoning administrator or planning commission to condition the project pursuant to Chapter 17.220:

(a) For projects of fifteen (15) or more dwelling units, the project has a manager that resides on-site;

(b) The owner/operator posts and maintains signage on the premises that provides the phone number to contact maintenance and management staff. Signage is subject to approval by the planning director;

The owner/operator repaints or retreats all painted or treated areas at least once every eight years, provided that the planning director may approve less frequent repainting or retreatment upon a determination that less frequent treatment is appropriate, given the nature of the materials used or other factors. The program is subject to review and approval by the planning director;

(e) The owner/operator maintains landscaping and irrigation in a healthy and serviceable condition; and

(f) The owner/operator indicates and maintains all locations of parking stalls for handicapped/disabled access and strictly enforces rules related thereto.
