Please state the reason you would like to be a member of this board/commission (or attach):

I have been in the solid waste and recycling industry since 1991. My experience includes design and evaluation of collection, recycling processing, green waste composting, disposal, street sweeping, and public outreach programs. I understand the Sacramento region and options available to support residential and commercial customer services.

I would be happy to offer my experience to the City of Sacramento and the Department of Utilities to assist them in evaluating future programs and rate impacts to the City and customers.

Are you currently, or have you in the past, served on an advisory group? Yes No If yes, state the name of the group and how that service supports your application (or attach).

65th Street RAC - 2011

Do you, or an immediate family member, have any relationship (professional, financial, other) that may present a potential conflict of interest for this advisory group? Yes No If yes, please explain:

I was the General Manager of Sacramento Recycling and I am currently working for Recycling Industries. Since the City is under contract for all residential and commercial recyclables, I would not have a potential financial gain from any future recycling programs implemented by the City.

Please state the reason you would like to be a member of this board/commission (or attach):

The first and foremost reason I have, is to take an active part in my community and the services that support it. As such I would take pride in acting as a liaison to encourage my community's understanding of, and participation in, the utility service rate setting process. As a benefit, I would begin to understand the City of Sacramento's civil process along with the scope and workings of our utility and infrastructure systems. I believe I can contribute with my analytical, engineering, and program management background to the process of department rate changes, recommendations on relevant issues, and participation in rate hearings.

WORK EXPERIENCE:

Office of the Secretary of Defense (OSD) Defense MicroElectronics Activity (DMEA) – Sacramento, CA (June 2009 – Present)

I work as a Project Electrical Engineer (855 Series) managing a portfolio of R&D tasks on the DMEA Advanced Technology Support Plan (ATSP) IDIQ contract. My current management portfolio is focused on SATCOM, RADAR, & Communications projects with a total value of \$120M through FY10. My primary responsibility with these tasks is to perform project management support including performance, schedule, cost, risk, and contract management. Partner agencies include DARPA, ONR, JIDDEO, OSD NII, and ARMY RDECOM. Executing vendors include Lockheed Martin, Raytheon, General Dynamics & Northrop Grumman.

SPAWAR Systems Center - San Diego, CA (July 2004 – June 2009)

I worked as an Electrical/Electronics Engineer (855 series) for PEO C4I PMW/A 170, the Navy Communications Acquisition Office. My primary role is to work as a microelectronics technology engineer and perform systems engineering and project management on future Navy EHF Protected SATCOM Terminals including the Navy Multiband Terminal (NMT) and the Transformational Communications (TC) terminal suites. Both systems are complex leading-edge weapon systems, ACAT IC and Pre-MDAP ACAT ID respectively, and provide EHF, Ka/GBS and X band to Navy sea vessels, land vehicles/equipment and submarine platforms while interfacing with MILSTAR I/II, Advanced EHF (AEHF), WGS, DSCS, and UFO/E/EE satellites. Working on these systems has required me to understand the physical characteristics and intended operation of MILSATCOM RF links, complex processing satellite protocols, associated electronics, and their jointly defined satellite interface control documents (ICD). My specific work activities include:

NTC Assistant Program Manager - Lead a diverse team of engineers (federal civilians, SAIC, MITRE, BAH, Linquest) to develop an innovative solution for next generation IP enabled protected satellites terminal (eg. AFSPC TSAT) while considering cost, schedule, risk and multiple technical centers including: user interfaces, networking, Information Assurance (IA), and RF performance. This development is a system upgrade to the current EHF terminal.

Superconducting Direct to digital RF Small Business Innovation Research (SBIR) - Act as the technical liaison to Hypres Inc. with the goal of retrofitting their proprietary Niobium (Nb) receive microelectronic chipset into the NMT baseline to allow direct-to-digital conversion of SHF signals potentially resulting in a 3dB gain increase through noise floor reduction and the elimination of a mixing chain.

Navy Networking - Investigated layer 2 and layer 3 devices in navy network centers (NCTAMS PAC) to determine the cause of network instabilities plaguing RF MILSATCOM and commercial communication systems. I co-authored a paper that summarized the results of this study. The paper was accepted and presented at the MILCOM 08 conference.

NMT EHF Amplifier - Provided engineering supervision/surveillance on two high power semiconductor electronics MMIC and SSPA designs (US monolithic & Raytheon) for Q-band (~40 GHz), and Ka-Band (~30 GHz) with the goals of high linearity, power output and reliability.

NMT Submarine Variant - Provided technical input and preliminary system planning on an analysis of alternatives (AoA) for the development and integration of future submarine unique EHF/SHF/X band antennas considering multiple microelectronics technologies including phased arrays and gimbal dishes with various amplification technologies including multi stage solid state amplifiers (gallium arsenide (GaAs) PHEMT, tracking GaN maturation) and traveling wave tube amplifiers (TWT).

NMT DDG1000 Variant - Gained electronics engineering experience, developed a Technical Direction Letter (TDL), and managed a Time and Material (T&M) contractual task award on the order of \$2.5M as a risk reduction measure (electrical and software interfaces) for the insertion/retrofit of the NMT into the Future Navy Ship system (DDG-1000 Zumwalt Class Destroyer).

AEHF Interface Control Working Group (ICWG) - Acted as Navy voting member on process of updating interface documents, maintaining backwards compatibility, and resolving technical issues while interfacing on a joint level (DoD terminals (Army, Navy, Air Force), mission planning & satellite contractors (Lockheed Martin/Northrop Grumman), and external agencies (NSA, STRATCOM, ect).
