Sacramento, CA 95834

**RE: Railyards Specific Plan (SCH 2006032058)  
Our Matter No. 0112.002**

Dear Mr. Johnson:

On October 3, 2007, this firm submitted, on behalf of Downtown Plaza, LLC, a detailed comment letter regarding the Draft Environmental Impact Report ("DEIR") for the Railyards Specific Plan ("Proposed Project"). Several of our prior comments concerned the DEIR's failure to disclose necessary details regarding the Proposed Project. Following the close of the public comment period, some of these additional requested details are now being disclosed. Unfortunately these additional details actually reinforce our substantive concerns regarding the nature and impact of the Proposed Project.

**1. Inadequate and Misleading Project Description**

Section I of our prior letter expressed concern about the misleading Project Description contained in the DEIR. We explained that the proposed Phasing Schedule describes a project that includes a very limited residential component and was more similar to a suburban big-box regional shopping mall than a mixed-use urban village. After reviewing the draft Development Agreement, it appears that the situation is even worse than we anticipated.

The *Development Agreement* includes specific minimum "Development Milestones" that the developer must satisfy in order to extend the term beyond the initial ten years. *Development Agreement*, draft dated Nov. 5, 2007, pp. 20-22. The *Development Agreement* sets a minimum Development Milestone of only 400 residential units. *Development Agreement*, p. 20. In other words, the

developer is perfectly free to construct – after a full ten years of development - only 400 residential units in order to extend the term for an additional five years. And if the developer chooses instead to construct its big-box regional shopping mall in the first ten years then it is not even required to construct any residential units. *Development Agreement*, §2.2.1. This is not the project that is either described in the DEIR or anticipated by the general public.

## **2. Impermissible Project Segmentation**

Section I of our prior comment letter raised concerns about the DEIR's impermissible segmentation of the Proposed Project. We demonstrated that the DEIR refused to acknowledge as components of the Proposed Project either (i) the extensive hazardous material remediation activity at the Railyards site, or (ii) the City's acquisition of the Intermodal Transit Facility. It has now been disclosed that the DEIR also impermissibly segmented the City's approval of a new Redevelopment Plan for the Proposed Project because the City is apparently preparing a separate EIR for its adoption of this new Redevelopment Plan.

It is difficult to see how the Redevelopment Plan for the Railyards site constitutes an independent project from the development entitlements for that same development. Indeed, the NOP for the Redevelopment Plan plainly states that the purpose of the new Redevelopment Plan is “to enable the Railyards Area to be developed and to provide support and assistance to that development . . .” And the draft *Railyards Specific Plan Public Facilities Financing Plan* (“*Financing Plan*”) - which was itself circulated for the first time just a few days ago – describes the significant interrelationship between the Railyards Redevelopment Plan and the development entitlements:

A public/private partnership is required to advance the [Railyards] project through the numerous development hurdles that will be encountered. This public/private partnership will function through the terms and conditions of the Railyards Development Agreement as well as other agreements with the City and Redevelopment Agency.

*Financing Plan*, draft dated November 2007, p. 7.

It is not surprising that the *Financing Plan* states that redevelopment funds are “required to advance the project” because 30 percent of all the

funding for backbone infrastructure will come from "City and Redevelopment Agency sources." *Financing Plan*, p. 12.

Thus, the new information that has become available after the close of the public comment period provides significant new evidence that the DEIR for the Proposed Project has been impermissibly segmented in violation of CEQA.

### **3. Inadequate "Fair Share" Mitigation Measures**

Our prior comment letter noted the DEIR's failure to adequately describe the Proposed Project's "fair share" mitigation measures (or "mitigating project components") for critical infrastructure improvements. Our prior letter set forth the required "fair share" information for an EIR:

- (i) An identification of the required improvement;
- (ii) An estimate of the cost of the required improvement;
- (iii) Sufficient information to determine how much the project would pay towards the improvement;
- (iv) The fees must be part of a reasonable, enforceable plan or program sufficiently tied to the actual mitigation of the impacts at issue.

Anderson First Coalition v. City of Anderson (2005) 130 Cal.App.4th 1173, 1188-89.

The *Financing Plan* now explains why the DEIR failed to adequately describe these elements for the various "fair share" mitigation measures. The reason, put simply, is that the required information had not been determined at the time the DEIR was circulated, and will not be completed until after the Proposed Project has been approved. According to the *Financing Plan*:

Depending on the timing of the General Plan Update relative to adoption of the Railyards Specific Plan, a comprehensive update to the fee programs may be completed at the same or at different times. ***Following adoption of both the Specific Plan and City General Plan Update, the technical work can be completed for a comprehensive update to the infrastructure programs and the development impact fee programs.***

*Financing Plan*, p. 56 (emphasis added).

This violates CEQA. CEQA case law is clear that this information must be disclosed in the DEIR – not after the close of the public comment period and certainly not after project approval. Anderson First, supra, 130 Cal.App. 4th 1173.

#### **4. Public Trust**

We finally note that the DEIR failed to describe the significant public trust issues implicated by the Proposed Project. As explained by the California State Lands Commission in its public comment letter dated October 3, 2007, portions of the Railyards site include tide and submerged lands under sovereign title by the State of California. These lands are subject to a public trust in favor of the use of such lands by the general public. According to the State Lands Commission, “Uses that are generally not permitted on public trust lands are those that are not trust use related, do not serve a public purpose, and can be located on non-waterfront property, ***such as residential and non-maritime related commercial and office uses.***” *Public Trust Policy for the State Lands Commission* (emphasis added).

While California law provides for a land exchange with private parties for these California sovereign lands, there is a serious question whether a land exchange for the benefit of the Proposed Project – apparently consisting in large part of a regional shopping mall – could satisfy the required conditions and purposes for such an exchange under California law. See Pub. Resources Code §6307. Moreover, the DEIR is devoid of any discussion of the potential impacts associated with such an exchange and the impact on public trust resources.

# SOLURI & EMRICK

November 13, 2007

Page 5

In short, numerous unanswered questions remain regarding the nature and impacts of the Proposed Project. A new DEIR must be re-circulated for public review after these outstanding issues are addressed.

Very Truly Yours,

**SOLURI & EMRICK**

Sacramento, CA 95816-0065

(916)

November 16, 2007

Honorable Heather Fargo  
Office of the Mayor  
City Hall  
915 I Street, Fifth Floor  
Sacramento, California 95814

Dear Mayor Fargo,

The Sacramento County Historical Society and many in the preservation community feel the Sacramento Preservation Commission was supplied incomplete and possibly deceptive information about the National Register rules for establishing Historic District boundaries. This may have influenced their perceptions about the National Register regulations and their decision regarding the city's Central Pacific Shops Historic District boundaries.

At the November 7, 2007 meeting, the Preservation Commission voted to accept Thomas Enterprise's boundaries for the proposed Central Pacific Shops Historic District, ignoring another proposal with a slightly different set of boundaries that embraced the historic Central Pacific Railroad's right of way. (Please see the attached historic map and recent aerial photographs showing the existence of the historic right of way and track.) The latter boundaries have been submitted to the Office of Historic Preservation for nomination to the National Register of Historic Places. The proposed National Register District encompasses a boundary footprint that considers the original setting of the railroad, including rail connections to its initial site on Front Street in Old Sacramento and the historic shop buildings where the locomotives and rail cars were actually constructed and maintained.

During the public hearing, some regulations for establishing National Register Historic District boundaries were quoted from page 2 of Bulletin # 21 and, it would appear, that hearing them at least partially influenced Preservation Commission members, affecting their decision. However the key regulations were quoted incompletely, suggesting that the setting of the resource was not to be considered. Actually, page 3 of the same Bulletin states that the boundaries "should not include only the footprint of the buildings, but must consider the setting and area involving the functions of the resource as well as existing physical elements."

We urge the Preservation Commission and City Council to amend the proposed local historic district to encompass the proposed National Register boundaries. This is Sacramento's, California's and our national heritage. The right of way marks the first transcontinental railroad in the history of the world. You are responsible for its protection and preservation. We would not like to see it forsaken for the short-term gains of a developer.

Sincerely,

Susan Ballew  
President, Sacramento County Historical Society

**Subject:** Yes on the Railyards Project,

As a member of the Sacramento Builders' Exchange, I support the passage of the Railyards Project. The Railyards project has been sufficiently vetted and needs approval in time to apply for state infrastructure funds. I ask that you fully support this project and vote YES for more construction jobs for Sacramento companies. For more info on the Sacramento Builders' Exchange YES position, contact the SBE Governmental Affairs Coordinator Joshua Wood at (916) 442-8991.

<nferrario@cityofsacramento.org>  
**Date:** Thursday, November 15, 2007 3:01 PM  
**Subject:** Chinese Heritage Section of the Railyard Project

---

Dear Sacramento City Council Members:

I am a third generation Chinese-American and was born and raised in San Francisco Chinatown. Even though I now live in Sacramento I still consider San Francisco Chinatown my home because of its physical and spiritual community. San Francisco's Chinatown has several community gardens, a cultural center, and a heritage museum which provide physical structures in which people can gather to exchange ideas and learn more about their cultural heritage. I have felt "homeless" here in Sacramento because there is not a centralized location to acknowledge and share my Chinese identity.

I believe the proposed Chinese Heritage Section of the Railyard Project will help to provide Sacramento's Chinese population a physical location to gather and regain a sense of shared community identity. A Chinese museum that commemorates the contributions of our Chinese pioneers is much needed to instill a sense of pride and identity to the younger generation. A Chinese garden which includes a pavilion and monument affords a tranquil setting to complement the museum. Therefore I urge you to bring back "Chinatown" to Sacramento.

Sincerely,

Melinda J. Seid

As a member of the Sacramento Builders' Exchange, I support the passage of the Railyards Project. The Railyards project has been sufficiently vetted and needs approval in time to apply for state infrastructure funds. I ask that you fully support this project and vote YES for more construction jobs for Sacramento companies. For more info on the Sacramento Builders' Exchange YES position, contact the SBE Governmental Affairs Coordinator Joshua Wood at (916) 442-8991.
