Heather

I thought this pole was down the road a few blocks. I was Wrong. It is right in my back yard. I can see from every point of my property.

I am opposed to this new pole.

The City has not posted the visual or environmental impacts the pole.

What is the amount of increased radiation I will be exposed to as a result of the proposed and all future equipment that can be installed on the pole??!!

I am not able to make it to the meeting tomorrow, please schedule another session once tis information is made available.

Just Say No To The Pole!!

Eric Scoville

942 7th avenue

Heather

We are opposed to the proposed 55' pole and wireless tower.

We live at 942 7th Avenue. This pole would be in our view as we enjoy the evening on our back deck.

We currently have great cell service. These folks are freelance gaining profits at our expense. They do not live in the area and would not be able to see the eyesore from Chico.

Again No, No, No!

Eric Scoville
