Subject: Re-sending email

Antonio,

Today Frank Schabarum called me about the proposed mono pole for Land Park. He asked me to speak at the public hearing on Thursday. I am unavailable that evening. I did tell him that he is welcome to use my previous email anyway he or you wish to. I am including it in this email in case you don't have it anymore

Antonio,

This letter is in regards to project number P10-001.

I moved here from Placerville about eight months ago, As I only use my cell phone for phone service I was vary surprised when I moved into my new house to find poor service (AT&T) than I found out that the only tower was out on Broadway. I live at 707 McClatchy Way so I am surrounded by a large concrete building to the West a concert wall to the East.

If this cell tower at Odd Fellows Cemetery is approved and installed, it will help those people living in Land Park that rely on there cell phones.

As many of us have seen these tree look alike cell towers blend in to the landscape well and after a short amount of time look like they have always been there.

Thank you for allowing me to address these issues

RE: project number P10-001 (104-foot Monopine at Odd Fellows Cemetery)

Dear Mr. Ablog,

We would very much like to support this project. There are several blocks which have extremely poor service around the Odd Fellows Cemetery. Having purchased a home in this area 31 years ago we are inclined to remain here for some time and would greatly appreciate the convenience that most other people in the city of Sacramento currently enjoy.

Being volunteers at the Old City Cemetery and also being familiar with the neighborhood for most of our lives we strongly feel that a Monopine would NOT detract from the beauty of the area. The effort that is currently made to modify the structures to blend in is much improved over the old towers. With the height of many of the trees in the cemetery the tower would not be an eyesore to many, if any, nearby residents.

Our feeling is that the benefit of this project should outweigh any negatives. Progress and technology should be available to everyone as long as efforts have been made to place towers in unobtrusive places.

Thank you for considering our strong support of this project. If need be, you may read our letter (anonymously, please) at the meeting on August 12, as we will be unable to attend in person.

Sincerely,

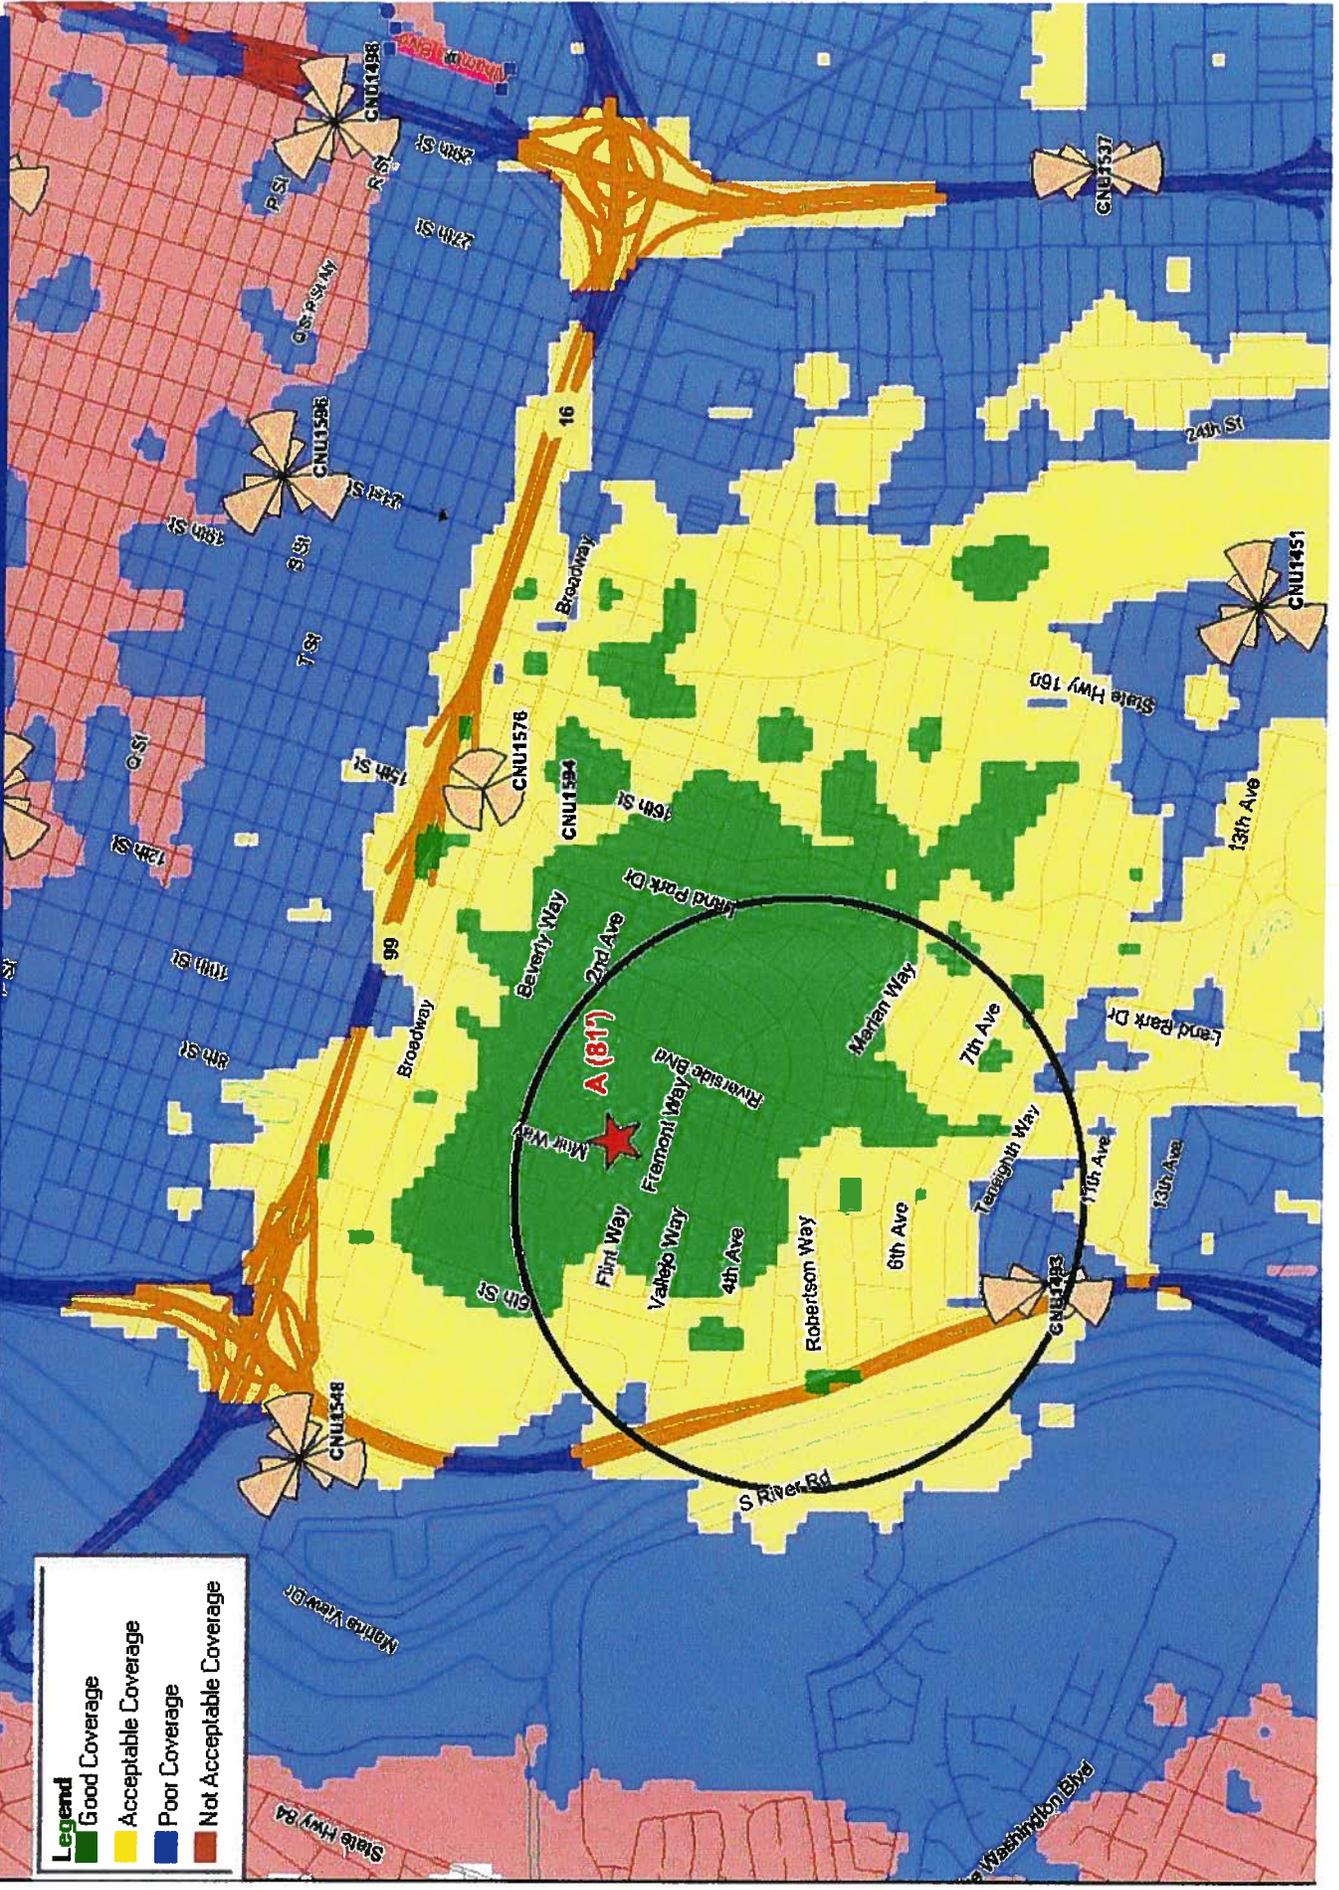

John and Bev Gonzales
